

BACK OFFICE

THE SUITE

Store Management Suite (SMS) is a client-based software solution that provides regional and national retailers with seamless, integrated management of the back office, corporate office, warehouse and all aspects of the retail enterprise. The suite contains modules that are typically outsourced, and ensures all necessary data is shared when, how, and with whom needs it. Instant connectivity, anywhere in the enterprise, on any connected device is reality.

THE OFFER

SMS offers the most advanced, most adaptable back office extension to Toshiba Global Commerce Solutions SurePOS ACE. The power and flexibility extend well beyond the back office too, fully integrating multi-store price book, purchasing, loyalty, financial reporting and operations.

The system is flexible enough to support multiple input combinations within the same environment, plus user interfaces can easily be customized for look and desired flow. Taking all back office functionality to the floor is available via various mobile devices, and the system is fully capable of bidirectional communication from store to host to other stores. Such integration offers a wide array of options for centralizing batch deployment, operator management, loyalty and club promotions, and more.

The seamless and integrated pricing and promotions engines offer unparalleled possibilities too. Traditional promotions and coupons are easily supported, plus chains can now extend promotional capabilities by offering multi-level conditions based promotions that drive customer behavior and increase basket size, plus maintain these capabilities all from a central location.

SMS FOR TGCS SUREPOS ACE OFFERS
