

Pay-at-Table System

- Part of Heartland's out-of-scope movement
- Wi-Fi enabled mobile device
- Process EMV, magnetic and contactless cards

Paying the check has never been so simple and secure!

As new payment technologies have emerged, more and more U.S. restaurant customers are demanding a faster, more secure process for payment acceptance. Heartland's new Pay-at-Table system provides a simpler and more secure solution for your diners.

Device

The newest component of Heartland's out-of-scope movement – the PAX D210 – is a revolutionary wireless payment device designed to interact with customers at the table and improve card data security.

Features

- Multi-user capability
- Split checks and edit tips
- Real-time POS updates
- Process credit, debit and gift cards
- Card data never enters your POS
- Edit closed transaction in POS without card present

Specifications

- Wi-Fi connection
- NFC payment acceptance
- EMV, magnetic and contactless card readers
- PCI PTS 3.x certified
- Built-in thermal printer
- 2.4" LCD display

POS System

Integrates directly with Heartland's Digital Dining POS solution built for restaurant owners by restaurant operators. This feature-rich system provides a comprehensive solution for table service restaurants, QSR and fast casual, bars and hotels.

As your business grows, Digital Dining allows you to easily add a variety of tools, including mobile ordering, employee scheduling and time capture and customer loyalty programs.
