

# Waitlist & Reservation Management

- Complete front-of-house management
- Multiple ways to increase covers turned
- Compatible with multiple devices

**Smarter waitlist  
+ Simpler reservations  
= Happier customers**

From reservations to waitlist and table management analysis, Heartland's Freshtxt improves restaurant efficiency driving revenue growth and cost savings.

## Smart Waitlist

Freshtxt's intelligent technology provides accurate wait times based on the status of your queue and seated tables. Mobile alerts allow you to notify guests by text or voice message the moment their table is ready.

## Easy Reservations

Whether taken online, via mobile app, by phone or in person, all reservations are synced in real-time. And our reservation system is completely customizable based on your procedures.

## Mobile App

The Freshtxt app give you and your customers even more flexibility. Additional features include:

- Organizes waiting parties and provides detailed updates with one touch
- Innovative seating system to help hosts during the busiest parts of the day
- Online reservations with no per-head or per-party fees
- Enterprise analytics provide insight into restaurant traffic patterns
